CS489/589 Assignment 1: Annotate a personal webpage using schema.org (5% of overall grade score)

- Due date and time: Check submission due date and time on Canvas.
- Submission method: Submit on Canvas.
- Document naming: SWOP_Assignment1_YOUR_NAME.ext (e.g. txt, pdf, doc, html) – make a .zip file if you have issues to upload html directly.
- Late submission policy: first time with valid reason – no penalty, otherwise 20% of score deducted each late day
- Use office hours to ask questions

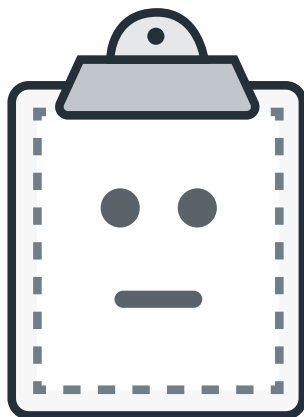

Note: Your report for this assignment should be the result of your own individual work. Take care to avoid plagiarism (“copying”), including all web resources, texts, and class presentations. You may discuss the problems with other students, but do not take written notes during these discussions, and do not share your written solutions. Use the numbering below when completing your responses to this assignment.

General assignment: Draft a personal webpage (for yourself or a fake person) in HTML format with schema.org Microdata annotation.

- Use at least 20 different properties from <http://schema.org/Person> → <http://schema.org/Person> to annotate the HTML tags in the webpage.
- Also, include least two other objects (and their properties), such as <https://schema.org/PostalAddress> → <https://schema.org/PostalAddress>,

<http://schema.org/Organization> ↗ (<http://schema.org/Organization>), <http://schema.org/Event> ↗ (<http://schema.org/Event>) and <http://schema.org/Product> ↗ (<http://schema.org/Product>).

- Check the documentation of schema.org to know how to use it: <https://schema.org/docs/documents.html> ↗ (<https://schema.org/docs/documents.html>). In particular, the section '[Getting Started](https://schema.org/docs/gs.html) ↗ (<https://schema.org/docs/gs.html>)' is a good document to read for new comers.
- You can refer to the examples (e.g. Example 1 - Microdata on <http://schema.org/Person> ↗ (<http://schema.org/Person>)) - scroll down to the bottom part of the page to find that example) but direct copying is prohibited.
- Use fake content for sensitive information if the webpage is for yourself.
- Online tools such as https://www.w3schools.com/html/tryit.asp?filename=tryhtml_default ↗ (https://www.w3schools.com/html/tryit.asp?filename=tryhtml_default) can be used to check the syntax of your HTML file.
- The tool <https://validator.schema.org> ↗ (<https://validator.schema.org/>) can be used to validate the Schema.org annotation you made to your HTML code.
- Check and review your file carefully before submitting it on Canvas.
