

Lab Assignment 2

Due Date: 19th September 2023

Points: 5

Submission Type: File Upload (only doc and zip file)

Important Note: Do not steal anyone's work, please. If we come across such a problem, we will adhere to the extremely risky UI academic regulations. Please be mindful of the deadline. Unless you notify me that you are ill or have another urgent matter, you will receive 0 if you miss the deadline. You must upload your work to Canvas. Please refrain from emailing your submissions. Any inquiries? Send me an email, please. Contact information: knaha@uidaho.edu

Deliverable:

1. A word doc file where you have to include all of the page's screenshots of your work. For example: Screenshot of Home page, About page etc. In this doc file (last page), please also include your live website link. To create a live website link, create a GitHub account and upload your work there and publish it. You can take help from <https://progate.com/docs/github-pages> . You also can search google to get more help.
****Only doc file is allowed, no other file formats are allowed and acceptable.**
2. A zip file where your source code could be found.

Task:

Build a portfolio/personal website. Please look the sample portfolio page below but you can design your one what you like.

Your personal website should include at least:

- **Header Menu:** Home, About, Portfolio, Contact (form and Map), Sign in (form), Signup (form).
- **Footer Menu:** Terms and Conditions, Privacy Policy, Cookie Policy.

- Google Map in contact page. You can get the embed html code from here:
<https://google-map-generator.com>

Note: Each menu should attach with different html pages. For example: “Home menu” will be linked with index.html page, “About” menu will be linked with about.html page. Each html will page should contain at least 5 paragraph contents and each content should contain at least 200 words. Also, in each html page you should use at least 10 tags from: <https://www.w3schools.com/tags/>. Also remember that if you are in “About page” then “About” link(menu) should be highlighted so that user can understand where he/she is.
